

CLOUDFLOW KNOWLEDGE BASE

ABOUT CLOUDFLOW

CloudFlow is a workflow-automation platform for teams. Users build "Flows": automated workflows that connect apps like Gmail, Slack, Google Sheets, HubSpot, and Zapier using visual triggers and actions. No coding is required. CloudFlow runs in the browser; there is nothing to install.

PRICING PLANS

CloudFlow offers three plans. All prices are per workspace, billed monthly.

1) Starter — \$19/month

- Up to 5 active Flows
- 1,000 tasks per month
- 2 team members
- 50+ standard connectors
- Email support

2) Professional — \$49/month

- Up to 25 active Flows
- 10,000 tasks per month
- 10 team members
- 150+ connectors, including premium connectors (Salesforce, HubSpot, Shopify)
- Multi-step Flows and conditional logic (if/then branches)
- Priority email support

3) Business — \$149/month

- Unlimited active Flows
- 50,000 tasks per month
- Unlimited team members
- All connectors, plus API access and webhooks
- Advanced features: scheduled Flows, error auto-retry, version history, audit log
- Priority support with faster response times

Notes:

- A 14-day free trial of the Professional plan is available; no credit card required.
- Plans can be upgraded or downgraded at any time from Settings > Billing. Changes take effect immediately; billing is prorated.
- Annual billing gives 2 months free (pay for 10 months, get 12).

KEY FEATURES

- Visual Flow Builder: drag-and-drop editor to create automations with triggers and actions.

- Connectors: integrations with popular apps (email, chat, CRM, spreadsheets, project management, e-commerce).
- Multi-step Flows (Professional and above): chain several actions after one trigger.
- Conditional logic (Professional and above): if/then branching inside a Flow.
- Scheduled Flows (Business): run Flows at fixed times, e.g. every Monday at 9 AM.
- Error auto-retry (Business): failed tasks are retried automatically up to 3 times.
- Templates: a library of 200+ prebuilt Flow templates.
- Activity log: every Flow run is logged with status, timestamp, and task details.

ACCOUNT & BILLING

- Refund policy: Full refunds are available within 14 days of purchase. After 14 days, payments are non-refundable, but you can cancel anytime to stop future charges. To request a refund, contact support with your account email.
- Cancellation: Cancel anytime under Settings > Billing > Cancel plan. Your plan stays active until the end of the paid period.
- Payment methods: All major credit cards. Invoicing is available on the Business plan.
- Changing account email: Settings > Profile > Email. A confirmation link is sent to the new address.
- Password reset: Use "Forgot password" on the login page; a reset link is emailed and is valid for 60 minutes.

SUPPORT HOURS

The CloudFlow support team is available Monday to Friday, 9 AM to 6 PM.

Outside these hours, requests are queued and answered on the next business day.

TROUBLESHOOTING: COMMON ISSUES

1) "My Flow isn't running."

- Check the Flow is toggled ON (green switch in the Flow list).
- Open the Activity log to see whether the trigger fired.
- Verify the trigger app connection under Settings > Connections; reconnect if it shows "Expired".
- Check whether you've hit your monthly task limit (Settings > Usage). Flows pause when the limit is reached.

2) "I can't log in."

- Use "Forgot password" on the login page to reset your password.
- Make sure you're using the email address the workspace was created with.
- Clear browser cache/cookies or try a private window.
- If you signed up with Google SSO, use the "Continue with Google" button instead of a password.

3) "A connector shows 'Connection expired'."

- Go to Settings > Connections, find the app, click "Reconnect", and re-authorize.

- Flows using that connector resume automatically once reconnected.

4) "My Flow ran but the action didn't happen."

- Open the run in the Activity log; failed steps show a red error with details.
- Common causes: missing required field mapping, or the connected account lacks permission in the target app.

5) "I hit my task limit."

- Usage resets on the 1st of each month.
- Upgrade your plan under Settings > Billing for a higher limit; upgrades take effect immediately.

6) "The app is slow or won't load."

- Refresh the page, or check status.cloudflow.example for ongoing incidents.
- Try a different browser; CloudFlow supports the latest Chrome, Firefox, Edge, and Safari.
